REPUTATIONS ARE MADE

*when dentures are discussed
in business offices*

OUTSTANDING ADVANTAGES

- It has ample strength (toughness without brittleness).
- It is permanently lifelike in color.
- It is stable in form.
- It does not develop internal strains.
- It has a hard surface, easily cleaned.
- It is readily repaired.
- It is ideal for both partial and full dentures.
- It reproduces accurately.
- It does not irritate oral tissues.

Denture work done in the dentist's office is only part of the picture. It's the conversations that take place afterwards—when patients talk about their dentures—that determine dental reputations.

If favorable comments could only be assured!

They can! In talking to your laboratory, specify *Lucitone*—the denture material recommended and guaranteed by both Du Pont and Caulk.

Because *Lucitone* is so precisely made and thoroughly tested, its satisfactory behavior in the mouth is assured. *Lucitone* means lasting peace-of-mind for your patients.

Why **THE PALMER HOUSE** **IS FOREMOST FOR FUNCTIONS**

◆ *Location*

In the center of things *IN* the city,
and *OF* the city . . .

◆ *Meeting Facilities*

3 floors, each larger than an average city block, are devoted exclusively to exhibition and meeting space. This includes 2 Grand Ballrooms and 34 Private Dining Rooms.

◆ *Guest Accommodations*

2,229 Rooms available for transient guests, many Air Conditioned. 6 excellent Restaurants. Sixty Shops, Ticket Offices, Service Depots—practically a complete city under a single roof!

Through 71 years, the PALMER HOUSE has founded its reputation upon Convenience, Comfort, Cuisine and Congeniality. As a result, the PALMER HOUSE entertains a larger number of "*REPEAT*" guests than any other hotel institution in Chicago. We invite particular professional people to make the PALMER HOUSE their Chicago headquarters. We assure you that you will measure every hour with sixty delightful minutes.

THE CALENDAR

- December 1st:** North Side Branch: Regular monthly meeting. Speaker: Dr. Stanley D. Tylman. Topic: *Acrylics*. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Michigan Room, Edgewater Beach Hotel.
- December 1st:** Greater New York Dental Meeting: First and Second District Dental Societies' annual five-day meeting. For further information, address all communications to Room 106A, Hotel Pennsylvania, New York, New York.
- December 1st:** Lake County Dental Society: Regular monthly meeting. Speaker: Dr. Howard C. Miller. Topic: *Methods and Procedure in Oral Surgery*. Dinner, 6:30 p.m. Meeting, 8:00 p.m.
- December 2nd:** South Suburban Branch: Regular monthly meeting. Program on *Acrylics*. Speakers: Vince Watrin and Robert E. Mitchell. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Harvey Elks Club, Harvey.
- December 2nd:** Kenwood-Hyde Park Branch: Regular monthly meeting. Speaker: Captain Joseph A. Tartre, (DC) U. S. Navy. Topic: *Navy Dental Corps*. Motion picture on Navy Dental School in Washington, D. C. Past Presidents' Night. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Del Prado Hotel, 5307 South Hyde Park Boulevard.
- December 2nd:** West Suburban Round Table: Regular weekly luncheon meeting. Speaker: Dr. Henry Stimson. Topic: *A Workable Denture Occlusion*. Oak Manor Hotel, 213 North Oak Park Avenue, Oak Park. 12:00 m.
- December 2nd:** West Side Dental Forum: Regular weekly luncheon meeting. Speaker: E. R. Butterfield. Topic: *Dentifrices*. Solick's Restaurant, 4207 West Madison Street. 12:00 m.
- December 3rd:** University of Illinois College of Dentistry Alumni: Annual homecoming. Details of program can be found elsewhere in this issue. Complimentary luncheon at noon. Banquet in evening at Illini Union Building, 715 South Wood Street.
- December 3rd:** Northwestern University Dental School: Annual "At Home Day." Scientific program from 1:00 to 5:00 p.m. Invitation is extended to all alumni and interested members to attend. 311 East Chicago Avenue.
- December 9th:** Englewood Branch: Regular monthly meeting. Past Presidents' and Old Timers' Night. Entertainment program. Punch Bowl, 6:00 p.m. Dinner, 7:00 p.m. Hayes Hotel, 64th Street and University Avenue.
- December 9th:** West Side Branch: Regular monthly meeting. Program on *Periodontia*. Speaker: Dr. Raymond W. Swanson, of the Northwestern University Dental School. His talk will be illustrated by colored motion pictures. Entertainment will follow dinner at 6:30 p.m. Meeting, 8:00 p.m. Graemere Hotel, Washington Boulevard and Homan Avenue.
- December 9th:** West Suburban Round Table: Regular weekly luncheon meeting. Speaker: A. H. Johnson, Acting Director of the Chicago Area of the F.B.I. Topic: *The F.B.I. and National Defense*. Oak Manor Hotel, 213 North Oak Park Avenue, Oak Park. 12:00 m.
- December 9th:** West Side Dental Forum: Regular weekly luncheon meeting. No speaker because of the Branch meeting in the evening. Solick's Restaurant, 4207 West Madison Street. 12:00 m.
- December 16th:** Chicago Dental Society: Regular monthly meeting. Speaker: Dr. John C. Brauer, of the University of Iowa. Topic: *Children's Dentistry*. Illustrated by slides. Meeting, 8:00 p.m. Red Lacquer Room, Palmer House.
- December 16th:** West Side Dental Forum: Regular weekly luncheon meeting. Speaker: Dr. Maynard K. Hine, of the University of Illinois College of Dentistry. Topic: *Vincent's Infection*. Solick's Restaurant, 4207 West Madison Street. 12:00 m.
- January 8th:** West Suburban Branch: Regular monthly meeting. Speaker: Dr. Stanley D. Tylman, of the University of Illinois College of Dentistry. Topic: *Acrylics and Their Application in Crown and Bridge Prosthesis*. Dinner, 6:30 p.m. Meeting, 8:00 p.m. Oak Park Club, 721 Ontario Street, Oak Park.

Children's Dentistry Will Be the Topic Under Discussion at the December Meeting of the Society

A program devoted to children's dentistry with that well known pedodontist, Dr. John Charles Brauer, as the essayist will ring up the curtain at the December Monthly Meeting of the Chicago Dental Society. Dr. Brauer will discuss the *Facts and Fallacies in the Practice of Dentistry for Children*. In arranging the program, Dr. D. Munger Hodgman, Chairman of the Program Committee, had the collaboration of Dr. Lloyd H. Dodd, Chairman of the Committee on Dental Health Education of the Illinois State Dental Society, and Dr. Charles F. Deatherage, Chief of the Division of Dental Health Education of the Illinois State Department of Health. This meeting will be held in the Red Lacquer Room of the Palmer House Tuesday evening, December 16.

ESSAYIST

John Charles Brauer, D.D.S., A.B., M.Sc., F.A.C.D., is the head of the Department of Preventive Dentistry, Professor of Pedodontics, and Director of the Bureau of Dental Hygiene at the State University of Iowa, in Iowa City. Dr. Brauer received his dental degree at the University of Nebraska in 1928, his A.B. degree in 1934 and his M.Sc. degree in 1936. After graduation he taught at the University of Nebraska, School of Dentistry, for several years. He then became Professor of Pedodontics at Atlanta-Southern Dental College and Di-

rector of the DeLos L. Hill, Jr., Memorial Children's Clinic of Atlanta. He left Atlanta to become Head of the Department of Preventive Dentistry at the State University of Iowa, College of Dentistry.

AUTHOR

Dr. Brauer is the author of a book entitled *Dentistry for Children* published in 1939. This book is one of those rarities of dental literature in that it contains a chapter on Preventive Orthodontics written by an orthodontist and a chapter on Nutrition written by a pediatrician. Dr. Brauer is, however, even better known for his outstanding work as the Director of the Bureau of Dental Hygiene which is sponsored jointly by the Iowa State Department of Health and the State University of Iowa. This position was held formerly by Dr. Charles L. Drain, the originator of the famed "Iowa Plan."

MOTION PICTURES

The preliminary to the main event of the evening will be a motion picture presented by Ade Schumacher, Assistant Athletic Director of Northwestern University, which will begin promptly at 8 o'clock. The picture will be of the current football season at Northwestern and will not consume more than thirty minutes. The business session will be short so that the scientific program will start early.

Openings Still Available in Class on Periodontia To Be Held at the Chicago College of Dental Surgery

Course Starts January 8; Interested Members Urged to Make Application Immediately

A few places remain open in the course in Periodontia offered by the Study Club Commission in conjunction with the Chicago College of Dental Surgery and scheduled to start Thursday, January 8. A session will be held each Thursday thereafter for ten weeks. The enrollment fee is \$25.00 and the instructors, Drs. Edgar D. Coolidge, Balint Orban and Joseph D. Weinman. Each session will be held from 3:00 to 5:00 p.m. at the College building, 1757 West Harrison Street. All applications for enrollment should be sent to the College and all checks made out to its order.

INSTRUCTORS

In Drs. Coolidge, Orban and Weinman, the Study Club Commission has secured three of the outstanding teachers in the field of periodontia to present this subject. This may be the last announcement concerning this course to appear in these pages which suggests that those in-

terested apply promptly to be certain of enrollment.

SYNOPSIS

The course will include a discussion and demonstration of the classification and pathology of periodontal diseases with the use of Kodachrome and black and white lantern slides. Time will be devoted to a discussion of the prophylaxis and the treatment of the various forms of gingivitis, including hypertrophic gingivitis and persistent pocket formation. Vincent's infection and its treatment will be considered, together with clinical demonstration of diagnosis and treatment. Completed cases of various conditions will be shown. Gingivectomy will be demonstrated on a patient with deep gingival crevices. The case will be completed during the course. Post-operative treatment with zinc oxide pack, silver nitrate and oxygen will be demonstrated.

Scientific Program for Midwinter Meeting Nearly Complete as Reported by Section Chairmen

General Session Speaker Obtained and Limited Attendance Clinic Program Complete

A distinguished program of essays and clinics is now practically completed for the 1942 Midwinter Meeting. An examination of recent reports from section chairmen shows that the men selected to appear before the convention will be nationally known figures and that their subject material has been chosen with the thought of solving the problems that occur in thousands of offices daily. The Chairman of the Program Committee, Dr. Otto W. Silberhorn, has stated that, because of the excellent cooperation of the section chairmen and vice-chairmen in carefully selecting the most qualified essayists in their respective fields, all indications point toward one of the finest presentations ever offered at these annual meetings.

GENERAL SESSION

Dr. Clark G. Kuebler, head of the Department of Classical Languages of Northwestern University, will be the speaker at the General Session on Monday, February 23, according to Dr. Silberhorn. Dr. Kuebler, who has travelled extensively in Europe and is a brilliant speaker, is ably qualified to discuss world conditions and his timely subject, *Antidotes to Frustration*, should command a capacity audience.

FULL DENTURES

Among the many noted essayists to appear before the Full Denture Section, of which Dr. Jerome L. Wilher is Chairman and Dr. Arthur W. Blim, Vice-Chairman, are the heads of the Denture Departments of the three Chicago schools: Dr. Henry Glupker, of the Chicago College of Dental Surgery, will discuss *Full Denture Impression Materials—Their Uses and Manipulations*; Dr. John S. Kellogg's paper on *Immediate*

Denture Prosthesis will be presented by Dr. Richard H. Holic, of the University of Illinois, College of Dentistry, and Dr. Rudolph O. Schlosser, of Northwestern University Dental School, will talk on *Practical Complete Denture Procedure for the General Practitioner*. Colored motion pictures and new display models will assist the speakers in presenting their papers.

Other subjects on this program will be *Complete Denture Service with Balanced Functional Occlusion*, by Dr. F. T. Daly, of Cambridge, Nebraska, President of the Central Nebraska Study Club; *Esthetics in Prosthetics*, by Dr. W. Leslie Warburton, of Salt Lake City, and *Construction of Successful Artificial Dentures*, by H. F. McGrane, of Omaha. In speaking of this well-rounded program, Dr. Wilher said, "We believe that these branch-subjects of full denture service cover the field thoroughly and that the sessions will certainly be worth attending."

OPERATIVE DENTISTRY

The spirit of the Section on Operative Dentistry can best be expressed in the words of the Chairman, Dr. Arne F. Romnes, who states that "This Section presents a most popular and appropriate subject for its opening session. The present interest in plastics for restorations in teeth has become so widespread that it has been deemed advisable to devote a full session to this subject. Since there are strong advocates for and against the use of acrylics in operative dentistry, it is hoped, during the Round Table Discussion, that the present status of acrylics will be made clear. This may be the most important contribution the Operative Dentistry Section will make during the Midwinter Meeting."

The participants in the Round Table Discussion will be Drs. Stanley D. Tylman, Eugene W. Skinner and William E. Wilson with the Section Chairman, Dr. Romnes, as moderator. During the last half hour of this discussion, the audience will be given an opportunity to ask questions.

In addition to the Round Table program, the Section presents such prominent essayists as Chicago's own Dr. LaMar W. Harris, who will give a brief lecture on the history of plastics and a discussion of its present use and processing technic with the aid of Kodachrome slides and a colored motion picture; Dr. Joseph R. Jarabak, of Indiana Harbor, known for his research in amalgam, who will talk on the *Clinical Interpretation of Physical Data in Dental Amalgams*; Dr. George M. Hollenback, of Los Angeles, on *Precision Gold Inlays Made by a Simple Technic*, which, Dr. Romnes states, will be one of the highlights of the program. Dr. Charles E. Hatch, recently appointed head of the Department of Operative Dentistry at the University of Illinois, College of Dentistry, will discuss *Some Major Problems of Dental Education*; Dr. William H. Crawford, Dean of the University of Indiana School of Dentistry, will present a paper on *Small Castings* with a new motion picture shown for the first time before the Midwinter Meeting, and Dr. Robert G. Kesel, Editor of THE FORTNIGHTLY REVIEW, will talk on *Etiology and Control of Dental Caries*, a discussion of its practical application by the general practitioner. The Vice-Chairman of this Section is Dr. Frank C. Besic.

PERIODONTIA

Dr. Alfred J. Drew, Chairman of the Periodontia Section, and Dr. Michael DeRose, Vice-Chairman, point out that in building their program it has been their aim to "stress fundamentals and at the same time give due consideration to those factors which new ideas and research bring out. Along the research angle, Dr. John C. Brauer, head of the

Department of Preventive Dentistry and Pedodontics at the University of Iowa College of Dentistry, will discuss *Systemic Diseases in Children and Their Effects on Oral Tissues*; Dr. Bernhard Gottlieb, Director of the Department of Oral Pathology and Dental Research of Baylor Dental College in Dallas, will give a paper on *Continuous Cementum Deposition as One of Nature's Means to Assure Functional Ability of Teeth*, and Dr. Willa Yeretsky, of Grand Rapids, Michigan, on *Gingivitis, Its Causes and Treatment*. Drs. G. R. Lundquist and Warren Willman, of Chicago, and Dorothea Radusch, of Minneapolis, will discuss the local factors, stressing the fundamentals."

In summing up the program, Dr. Drew makes this statement: "In the main, the idea back of the entire program is a desire for more knowledge of the systemic phase with the hopeful thought that the local factors may then assume a more understandable position in the treatment procedures."

THERAPEUTICS

Plans are complete for the presentation of papers on the latest findings relative to caries by Dr. Leonard S. Fosdick, of Northwestern University Dental School, and Dr. Thomas J. Hill, of Western Reserve University, School of Dentistry, according to an announcement made by Dr. William G. Skillen, Chairman, and Dr. Isaac Schour, Vice-Chairman, of the Section on Therapeutics, Pathology and Research. Both of these men have found appreciative audiences at previous Midwinter Meetings.

The Section will also present the latest studies of Dr. Theodor Rosebury, of New York City, on Vincent's infection. This paper is reputed to be "an excellent piece of work and will be presented on the same program with our well known Dr. Balint Orban, who will speak on the treatment of the pyorrhea pocket," states Dr. Skillen. Of a purely research nature, are papers to be pre-

(Continued on page 24)

Members Urged to Check Signs for Violations of the Illinois Dental Practice Act*

For some time past the Department of Registration and Education has been conducting a statewide campaign to eliminate signs that are in violation of the Dental Practice Act. Generally speaking, the results obtained have been good but because of the large number of dentists to be checked

and the limited facilities of the Department, progress has not been as rapid as the Department desires. Moreover, there has been a great deal of misunderstanding as to the provisions of the Dental Practice Act respecting signs. The purpose of this article is, therefore, two-fold. First, to explain the law in relation to signs and second, to request the whole-hearted cooperation of those members who, unwittingly, are violating the Den-

tal Practice Act by displaying signs that do not meet the requirements of the law.

SECTION 18B

Section 18b of the Illinois Dental Practice Act provides that a dentist may display his name "on the premises where engaged in the profession, upon the windows thereof and by a door plate or name or office directory when the information is limited to that of the professional card. Provided, that the name and title of the registrant shall not be dis-

played in lettering larger than seven (7) inches." It is obvious from this that to display one's name in any other manner is in violation of the law. To facilitate a better understanding of what is prohibited the three most common violations are illustrated.

*Publication authorized by the Board of Directors.

CHECK SIGNS

The reader is urged to check his own signs in order to be certain that no sign violations are being committed. Certainly no ethical dentists, particularly the members of the Chicago Dental Society, would knowingly display illegal signs or in any other manner violate the Dental Practice Act. It is hoped that the information contained herein will be helpful to all concerned and contribute to a better understanding of the sign problem.

Public Relations Commission Approves Report of Mouth Hygiene Council at Meeting Held on November 10

Report Proposes the Securing of Full Time Director and Expenditure of \$12,000 for Educational Purposes

The Mouth Hygiene Council report was the main topic of discussion of the Public Relations Commission at a meeting held at the Palmer House on November 10. After the reading of a short history of the Public Relations Commission, Chairman H. R. H. Brevig called upon Mr. John J. Hollister to read this very epoch-making report. Briefly, it proposed the expenditure of twelve thousand dollars through the Mouth Hygiene Council in the ethical advertising of dentistry to the public. It was suggested that the Chicago Dental Society appropriate \$6,000 from its treasury with the understanding that such sum would be matched by other organizations which should benefit from the increased business entering the dental office. The Mouth Hygiene Council's plan proposed the establishment of a central office with a full time staff headed by a qualified director whose job it will be to develop dental health educational activities and carry them into effect. Everyone present agreed that there was a definite need for an organization and program of this character and that the rank and file of the profession in Chicago would welcome it and give it enthusiastic support.

COMMENTS

"The publicity must be strictly educational and not commercial," stated Dr. Lon Morrey, who spoke interestingly regarding the import of this desirable venture.

"Twelve thousand dollars seems like a lot of money for the Society and allied groups to spend, but it might well develop into a hundred thousand a year as other organizations and various foundations become interested," said Dean Charles W. Freeman.

Dr. William I. McNeil spoke of his many years as a member of the Mouth Hygiene Council and praised the work of the women who had accomplished so much on such meager appropriations and with the handicap of disconnected activities because there was no full time director. He thought that after the Commission has demonstrated what can be done, the raising of future funds will be comparatively easy.

Dr. Harold Oppice said that the money had to be furnished first and the director secured before a complete program could be worked out, that failure to do so had stymied past efforts, that the Mouth Hygiene Council could certainly do a job we couldn't do alone, and that Dr. Freeman's mention of \$100,000 a year expenditure in the future could be entirely possible.

Dr. Wallace N. Kirby, who served so capably as Radio Chairman for several years, suggested that the director could well spend part of his time in educating members in methods of bringing patients to the dental office.

Several others spoke on the question, among them, Dr. Harold H. Hayes, Dr. Allan G. Brodie and Dr. Mary Newell.

HEALTH COLUMN

Plans were then announced and discussed by the Commission concerning the possibility of local dentistry gaining some recognition in the health column of the new morning newspaper. "All dentists who follow these columns in the daily press realize what a poor job of answering dental questions is often done by physicians," said Dr. Harold Oppice, who stated that the Board of Directors had this matter under advisement.

(Continued on page 22)

Board of Directors Approves Mouth Hygiene Council Report at Meeting Held on November 18

Many Items of General Interest Transacted
at Meeting Held in the Palmer House

At the meeting of the Board of Directors held at the Palmer House on November 18, many items of business were transacted most important of which was the approval of the Mouth Hygiene Council report. Others items of general interest follow, which are taken from the official minutes prepared by Dr. Harold W. Oppice, Secretary.

MOUTH HYGIENE COUNCIL

Report of Public Relations Commission re Mouth Hygiene Council: Dr. Frank J. Hurlstone, Chairman of the Board's sub-committee on Commissions and Boards, presented a report which contained a recommendation to the Board to approve the dental health education program of the Mouth Hygiene Council. Briefly, this program calls for an expenditure of \$12,000 and the employing of a full time director to handle the educational work. After viewing a specimen slide film projection which is to be used in the educational program and with an amendment to the effect that the Society's subscription of \$6,000 be contingent upon the balance of the budget being subscribed from other sources, the Board approved the report.

Report of Public Relations Commission on New Morning Newspaper: The recommendation of the Public Relations Commission to contact the officials of the new morning newspaper regarding a dental health column was approved.

Report of the Executive Secretary: Mr. John J. Hollister reported that letters of assignment to space had been sent to all exhibitors, that a meeting between Midwinter Meeting Committee Chairmen and Palmer House officials had been arranged, and presented several other matters, all of which were accepted by the Board.

Confirmation of Poll re Special Com-

mittee on Health and Educational Exhibits: Dr. Harold W. Oppice, Secretary, asked for a confirmation of the poll by telephone of the Public Relations Commission's recommendation that the management of the Health and Educational Exhibits be given to a special committee. Previously, this committee was a sub-committee of the Public Relations Commission but because of its importance to the Midwinter Meeting, it was felt that it warranted a full committee. The Board confirmed the poll.

Report of Publicity Committee: The report of the Publicity Committee recommending the firm of Arnold and Jackson to handle the publicity for the Midwinter Meeting was presented to the Board and approved.

LETTERS

Letter from Secretary of Minnesota State Dental Association: Dr. Oppice read a letter from Dr. L. M. Cruttenden, Secretary of the Minnesota State Dental Association, asking that the Board of Directors give consideration to the problem pertaining to the dates for our Midwinter Meeting in relation to the Minnesota meeting. This matter was referred to the Midwinter Meeting Affairs Committee for study.

Letter from Dr. L. H. Jacob: In his letter of November 5, Dr. L. H. Jacob suggested that consideration be given to terminating dues refunds to members in service called up in the latter part of the year. The Board voted that members called to active service after September 1 be ineligible for dues refund for 1941.

Progress Report of Redistricting Committee: Dr. Oppice read a report submitted by Dr. W. J. Bray, Chairman of the Committee, indicating that work on the problem has been begun.

(Continued on page 24)

NEWS AND ANNOUNCEMENTS

ENGLEWOOD HOLDS OLD TIMERS' NIGHT DECEMBER 9

The Annual Old Timers' Homecoming of Englewood Branch, an institution of long standing, will be held on Tuesday evening, December 9, at the Hayes Hotel, 64th Street and University Avenue. All living past presidents of Englewood will be fittingly honored and all men who have been practicing for twenty years will be inducted into Englewood's Old Timers' Club.

The evening's activities will be strictly social and will be devoted to fun, food and fellowship. Attendance is not limited to members of Englewood, but the officers, Drs. Thomas E. Fleming, President, John Mockus, Vice-President, Milton Cruse, Secretary, and Joseph Jun, Treasurer, extend a cordial invitation to members of other branches and their male lay friends to be present.

Because of the special arrangements being made it is necessary to insist on reservations. Dr. Samuel Rabishaw, Dinner Chairman, Hemlock 4551, is accepting reservations which must positively be made by Monday, December 8. Tickets for the dinner and accompanying entertainment will be \$1.50.

The preliminary reunion, between six and seven o'clock, will take place around the traditional punch bowl. From seven to eight an unusually fine turkey dinner will be served. During this two-hour period, gay music will pervade the atmosphere and will include the usual community harmony.

Following the dinner the past presidents will be honored in a short ceremony, and the twenty-year men will be inducted into the "Old Timers' Club."

A professional variety show will conclude the evening with several acts of high class talent. No additional charge will be made for the entertainment since all is included in the price of the dinner, which is \$1.50. Reservations are posi-

tively necessary and must be in by Monday noon, December 8.

The Old Timers' Committee is headed by Dr. Milton Cruse, Chairman, and Dr. Thomas J. McCarthy, Secretary.—*Thomas E. Fleming, President.*

ILLINOIS ALUMNI HOMECOMING TO BE HELD DECEMBER 3

Alumni and friends of the University of Illinois College of Dentistry are invited to attend the annual homecoming which will be held Wednesday, December 3, in the College, 808 South Wood Street.

An open house will be held from 9:00 to 11:00 a.m. to allow all visitors to meet informally with members of the staff and other alumni. At 11:00 a.m. two motion pictures will be shown: *Vital Pulp Removal and Root Canal Filling*, by Dr. Robert G. Kesel, and *Root Resection Followed by Immediate Root Filling*, by Dr. Henry J. Droba. At 12:00 noon a complimentary luncheon will be served. In the afternoon, Dr. Charles E. Hatch, new Head of the Operative Department of the College of Dentistry, will discuss *The Preclinical Sciences; Their Role in Clinical Teaching*; Dr. J. R. Thompson will read a paper on *The Constancy of the Position of the Mandible*; the adaptation of this paper to general dentistry will be discussed by Dr. J. S. Kellogg.

A banquet will be held in the evening in the Chicago Illini Union building, 715 South Wood Street. The speaker of the evening will be Mr. James Walsh from the Bureau of Narcotics. Tickets for the banquet may be purchased from Dr. R. D. Curtis, Monroe 3900, extension 386.—*M. K. Hine, President of the Alumni Association.*

NORTHWESTERN "AT HOME DAY" WEDNESDAY, DECEMBER 3

One of Northwestern University Den-

tal School's annual "At Home Days" will be held Wednesday afternoon, December 3, from 1 to 5 o'clock. The afternoon will be devoted to scientific discussions, round tables, and new feature presentations. An invitation is extended to all alumni to spend this afternoon at the school and to any members of the Chicago Dental Society who might be interested.—*Edgar W. Swanson, Chairman, Faculty Alumni Committee.*

SEND IN PROBLEM CASES FOR DIAGNOSIS CLINIC NOW

The cooperation of the members is needed to make the Oral Diagnosis Clinic of the Midwinter Meeting a success. Dr. John Hoppers, who is in charge of this Clinic, asks that members, who have problem cases which they would like discussed by a staff of men qualified in their respective fields, send them in as soon as possible for only those questions which are received before the meeting can be answered. Names will not be mentioned when the cases are discussed but in order to acknowledge receipt of questions, it is necessary to have the signature of the member. In submitting the questions, it is desirable to send radiographs or study casts of the problems.

Dr. Hoppers announces that the men on the advisory staff are as follows: Dr. R. E. Blackwell, Operative Dentistry; Dr. Frederick F. Molt, Oral Surgery; Dr. Edgar D. Coolidge, Dental Therapeutics; Dr. George W. Teuscher, Pedodontia; Dr. William I. McNeil, Partial Dentures, and Dr. Rudolph O. Schlosser, Full Dentures.

DR. J. CANNON BLACK HONORED AT DINNER

Colleagues and friends of Dr. John Cannon Black attended a congratulatory dinner held in his honor on November 26 at the Chicago Athletic Club. Dr. Black was elected unanimously President-Elect of the American College of Dentists at the convocation in Houston,

Texas, held in conjunction with the meeting of the American Dental Association.

EXAMINATION FOR APPOINTMENT IN NAVY DENTAL CORPS

The next examination for appointment as assistant dental surgeon, U. S. Navy, (Lieutenant, junior grade), Dental Corps, U. S. Navy, will be held at the Naval Training Station, Norfolk, Virginia, the Naval Training Station, San Diego, California, and the Naval Training Station, Great Lakes, Illinois, on February 9, 1942. Application for this examination should be made to the Chief of the Bureau of Medicine and Surgery, Navy Department, Washington, D. C.

Applicants for appointment as assistant dental surgeon must be citizens of the United States, more than 21 but less than 32 years of age at the time of acceptance of appointment, and graduates of a class A dental school.

A circular of information listing physical and other requirements for appointment, subjects in which applicants are examined, and other data pertaining to salary, allowances, etc., may be obtained from the Bureau of Medicine and Surgery, Navy Department, Washington, D. C. on request.

Assistant dental surgeons are appointed in the rank of Lieutenant, (junior grade), Dental Corps, U. S. Navy. The pay and allowances for an officer of this rank total \$2,699.00 a year if he has no dependents and \$3,158.00 a year if he is married or has dependents.

DENTISTS NEEDED IN DEFENSE AREAS

A need for additional dentists exists in many of the vital defense areas, according to Thomas Parran, Surgeon General, U. S. Public Health Service, Washington, D. C. These shortages have arisen because of the great increases in civilian population which have occurred during the year. At present, needs exist

in a number of states in communities varying in size from small villages to large cities. A continuing increase in population will result in overtaxing the dental personnel in many other localities where at present the dentists are very near the limit of their capacities.

In many of these defense areas there are Defense Housing Projects in which office space or living accommodations, or both, may be secured. The United States Public Health Service in cooperation with the Division of Defense Housing of the Federal Works Agency, which supervises these projects, is interested in acquainting dentists with the needs of these communities. If you are interested in securing more specific information about localities for the establishment of practice, please communicate with the office of the Surgeon General.

DR. CLARENCE E. PROCTOR 1886-1941

It is with regret that the Society announces the death of Dr. Clarence E. Proctor on September 26 at the age of 55 after a short illness in the Ravenswood Hospital.

Dr. Proctor was graduated from the Northwestern University Dental School in 1917. He was a member of the Chicago Dental Society through the North Side Branch, the Illinois State Dental Society and the American Dental Association.

He is survived by his widow, Ruth, and a sister. Interment was in White County, Springerton, Illinois. The Chicago Dental Society offers its condolences to the bereaved relatives.

DR. CHARLES C. COOLEY 1881-1941

Dr. Charles C. Cooley, a member of the North Side Branch, died suddenly on October 12 in his home in Warrenville, Illinois, at the age of 60. Dr. Cooley practiced dentistry for nearly forty years at 25 East Washington Street.

Dr. Cooley graduated from the Chi-

cago College of Dental Surgery in 1903. He was a member of the Chicago Dental Society, the Illinois State Dental Society and the American Dental Association.

His widow, Elizabeth, survives. The officers and members of the Chicago Dental Society extend their sincere sympathies to the widow.

PAPERS ON PERIODONTIA REQUESTED BY N.Y.U.

The Periodontia Department of New York University College of Dentistry cordially invites each investigator in the field of periodontal disease who has published a paper or papers containing the results of either laboratory research or clinical observations which bear directly or indirectly upon the etiology or treatment of periodontal disease in man or animals (1) to submit a concise summary of those of his papers which he deems to be his basic contributions to this field and which he considers to be in agreement with his present thinking, or with his experience and thinking up to a time specified by him; and (2) to cite the location and time of appearance of such paper or papers which contain such basic findings; also (3) to enclose any additional statement that may seem necessary to him to amend the foregoing statements so that they are more accurately reflect his present opinions.

These summaries will, therefore, contain only present opinions, rather than the total results of each worker's endeavors which may, in addition, include errors, duplications, altering viewpoints, etc. The compilations of such summaries which will contain the essence of each investigator's present thinking will then be published in book form and will, therefore, not be a series of abstracts of papers on either the etiology or treatment of periodontal disease.

The summary should be sent to Dr. Samuel C. Miller, Associate Professor of Periodontia, New York University, College of Dentistry, 209 East 23rd Street, New York, New York, not later than March 15, 1942.

Large Crowd Attends November Meeting To Hear Program on Acrylics

Several Interesting Table Clinics Add
to the Value of the Session

The symposium on acrylics attracted a large and, for the most part, enthusiastic audience to the monthly meeting of the Chicago Dental Society at the Palmer House on November 18. Dr. Eugene W. Skinner, of Northwestern University Dental School, Dr. Stanley D. Tylman, of the University of Illinois College of Dentistry, and Dr. Henry Glupker, of the Chicago College of Dental Surgery, were the speakers. Although there was, perforce, considerable overlapping, these gentlemen displayed a keen knowledge of their subject.

CAREY

The experiment of presenting a speaker on a subject outside of dentistry before the regular scientific session seemed not to go over so well. Perhaps it was the lateness of the hour (it was 8:30 before a sufficient number of members had registered and made their way into the Ball Room to constitute an audience), perhaps it was because the speaker hadn't been told of the lengthy program to follow, anyway by the time he was through, half of the gathering was ready to disperse. Dr. Eben J. Carey, Curator of the Museum of Science and Industry, was the special speaker and he treated his subject, "The Obligation of Medical and Dental Science to the Public," in a most interesting fashion. He issued a special invitation to dentists to visit the Museum, one of Chicago's outstanding institutions.

Dr. Eugene W. Skinner was the first of the three speakers in the symposium on *Acrylics*. The fact that he is an outstanding physicist and chemist probably accounts for his somewhat critical attitude towards this temperamental plastic material. Dr. Skinner admits that the acrylics are excellent as denture materials but he is a bit skeptical about their

use in restorative work such as crowns, inlays and bridges. They haven't the elastic limits nor the tensile strength of gold. Dr. Skinner's dissertation served as a warning to those who barge in where angels fear to tread but shouldn't discourage those intrepid souls who are working towards the millennium; an all-purpose material that's fool proof.

TYLMAN

Dr. Stanley D. Tylman, the second speaker, was somewhat more optimistic. He traced the history of the attempt to substitute synthetic materials for precious metals, especially in Europe where gold and silver have practically disappeared from the dental scene. It was in June 1938 that the first article describing acrylic crowns appeared in the foreign literature. In June 1940 the first restorations of this material were made in the United States. Dr. Tylman asserted that bridges made of acrylic resin require additional metallic structural reinforcement. It cannot be substituted for gold and porcelain in all cases. Dr. Tylman illustrated his paper with some excellent colored slides.

Dr. Henry Glupker was the final speaker of the evening (and by this time half of the audience really had left). He described the laboratory procedures in full denture construction and stated that most of the early failures were due to faulty processing. With the improvements that have taken place in this procedure the acrylics have become a superior denture base both in appearance and strength. There are some undesirable characteristics such as a tendency to check or fracture the artificial teeth, too great shrinkage, tendency to pit when moulded in large quantities and the tendency to produce dimensional changes.

BOOK REVIEW

Applied Orthodontics: By James David McCoy, M.S., D.D.S., F.A.C.D., Associate Clinical Professor of Surgery (Oral), School of Medicine, University of Southern California, Los Angeles; Formerly Professor of Orthodontics in the College of Dentistry, University of Southern California, Los Angeles. Fifth edition, thoroughly revised, 1941. Octavo, Pp. 333, illustrated with 227 engravings and a plate. Cloth. Price, \$4.50. Philadelphia: Lea & Febiger Company. 1941.

The latest edition of *Applied Orthodontics* by Dr. James D. McCoy contains on its title page the statement "fifth edition, thoroughly revised." A comparison of this edition with the fourth published in 1935 brings out the fact that only few changes were made in the text. These included the addition of a paragraph at the end of four out of the first seventeen chapters, changes, though not radical, in the chapter on "Requirements of Treatment," the addition of a few figures, and the changing of a few others. The opinion one receives by the comparison is that the few changes made do not merit the recommendation of this volume to anyone now possessing the last edition. It also seems that in a span of six years sufficient changes and new opinions have been brought out in this more or less rapidly progressing specialty of orthodontics to have warranted a more radical revision of this text.

To the dental practitioner interested in orthodontics or to the dental student for the study of this branch of the dental science the latest edition or even the last is admirably suited. Within the 329 pages Dr. McCoy has written much that is of value and has done this in a very readable and easily understood manner. The conciseness with which the material is compiled and its excellent organization enhances the value of the book tre-

mendously. The author states in the preface: "In writing a book, many thoughts occur to an author which he might wish to include within its pages. His decisions, however, must be guided largely by the purposes of the text, for these place limitations which are quite definite. Without such restraints, any book might become too voluminous and thereby lose its usefulness. Orthodontics has an abundant literature and if this book stimulates its readers to seek the many sources of help there available, it will have served its purpose." Even with these limitations a clear and definite picture of the orthodontic problem is presented.

The first chapter dealing with "The Object and Scope of Orthodontics" contains a sentence very significant to anyone interested in this specialty that "we should not fall into the error of attempting to segregate one special field from the rest of the body, for the study of growth and development in all its phases is necessary to a correct comprehension of some of our most important problems." The text continues into a consideration of the growth of the masticatory apparatus and from this to the various dental and oral anomalies found here. The Angle classification of these anomalies is considered only "for the historical interest it bears to the evolution or (of) orthodontic methodology." Their etiology is next taken up in a thorough but concise manner.

"Pre-treatment Requisites" are next discussed, stress being placed upon the use of gnathostatic casts, photographic facial reproductions and roentgenographic records in the obtaining of the orthodontic diagnosis. Included in this section is the chapter on "Tissue Changes Incident to Movement of Teeth" in which the author states that "It is a lamentable fact that teeth are all too frequently moved by those who have but a vague knowledge of the process in-

BOOK REVIEW

volved within the tissues. . . . If it were not for the fact that the structures involved are capable of standing considerable abuse, more damaging results would be brought to light. . . . For this reason it behooves the student of orthodontics to gather as much information as possible concerning this phase of the subject. Not only is it intensely interesting, but it has a practical application second to no other which he may be called upon to consider. Those unwilling to do this have no moral right to attempt orthodontic operations."

The section covering the general aspects of orthodontic appliances follows, including in it the application of these appliances to the movement of the teeth. Appliances described are, generally speaking, those of the labio-lingual types. Eleven cases are discussed under "Requirements of Treatment" from the standpoint of history and attributing etiology, differential diagnosis and treatment therapy employed. The text concludes with the chapter on "Post-Treatment Requisites" in which is considered muscle training as an adjunct to mechanical treatment and the appliances used in retention.—*Thomas L. Grisamore.*

American Illustrated Medical Dictionary: By *W. A. N. Dorland, A.M., M.D., F.A.C.S.*, with the collaboration of *E. C. L. Miller, M.D.* Choice of flexible or stiff binding. Plain, \$7.00; thumb indexed, \$7.50. Pp. 1647, with 914 illustrations; 100 in color. Philadelphia: W. B. Saunders Company. 1941.

The new edition, the nineteenth, of this well known dictionary has been revised and over 2,000 new words added. New drugs, serums, vitamins and endocrine derivatives are included. Such newer dental terms as *chronic endemic fluorosis* and *dens in dente* are included and satisfactorily defined. The contents are well arranged and easily read and the descriptive definitions are adequate.

This dictionary is the standard adopted by the press of the American Medical Association. It offers a quick reference service and will serve as a valuable aid to those who follow the dental and medical literature.

Your Teeth: Their Past, Present and Probable Future: By *Peter J. Brekhus, B.A., D.D.S.*, Professor of Oral Diagnosis, School of Dentistry, University of Minnesota. Twenty illustrations, 255 pages and index. Price \$2.50. Minneapolis: University of Minnesota Press. 1941.

Has the incidence of dental caries increased or decreased in the past ten years? Have the efforts of the dental profession to educate the public to eat a correct diet and use a toothbrush resulted in better oral health? Answers to these and countless other interesting and pertinent questions are given in detail in this small book *Your Teeth* written by Dr. Brekhus. Incidentally, according to careful study by Dr. Brekhus, 4 per cent more teeth were attacked by dental caries in 1939 than in 1929; even after years of intensive education in the value of adequate diet and prophylactic care, careful research gives evidence that dental caries is more prevalent today than it was before these so-called remedies came into vogue. Books on dental subjects written for the general public are, unfortunately, rare, but here is one which the dentist can recommend to be read by everyone because it contains material both interesting and accurate.

The main objective of the author in publishing this book "has been to enlighten intelligent people outside the dental profession, who for decades have been told a great many things about their teeth that are not so." The book will be helpful to public health educators and social workers, and should result in dentists looking upon their problems from a

(Continued on page 22)

NEWS OF THE BRANCHES

NORTH SUBURBAN

The North Suburban Branch celebrated its 10th Anniversary Clinic Day, Wednesday, November 12, at the Orington Hotel, Evanston. Nearly 500 members and guests thronged through the lobby, lecture rooms and Ball Room to see what they could see and hear what they could hear . . . The luncheon given for educators, P.T.A. members, Public Health officers and nurses proved to be a splendid innovation. Dr. Gerald D. Timmons, the luncheon speaker, handled his subject, *Dental Health Programs and the Selective Service Act*, in a highly commendable manner and completely won over his audience. Our "inquiring reporter" rambled through the lobby after the meeting and heard many favorable comments, such as: "Let's have more of these things"; "That speaker really opened my eyes as to what we educators can do to help in a health program"; "This luncheon idea is swell, I like it. Most of us can get away to come to one of these affairs but it's hard to find a free evening" . . . Dr. Balint Orban and Mr. J. P. Revenaugh drew capacity audiences at their Limited Attendance Clinics. Mr. Revenaugh had a court stenographer present, during the question and answer period, to take down the proceedings verbatim. He expects to accumulate a lot of valuable information in this manner, information that is pertinent to his subject *Business Management* . . . The Table Clinics given by the Chicago Dental Society members aroused a lot of interest, although it can't be said that the spectacle was anything like flies gathering around the honey jar. The orthodontists were particularly impressed with the technique for deimpacting the impacted third molar; probably with an eye to snatching the business away from the oral surgeons! . . . The evening banquet attracted an assembly of 125, of whom

some 20 were guests of honor, including the Mayor of Evanston. The Northwestern University Round Table discussion was directed by Parker Wheatley who lent a bit of humor to the occasion by simulating the regular radio broadcast by this group. Professors John C. Eberhart, Stuart McMullen and Earl DeLong proved that they possessed a fund of knowledge about the present world situation. They didn't exactly answer the question of what America will do in the world of tomorrow but made it plain we had to either "beat 'em or join 'em."—James H. Keith, Branch Correspondent.

WEST SUBURBAN

On Tuesday, November 18, Dr. R. W. McNulty, Assistant Dean of the Chicago College of Dental Surgery, spoke before the Round Table on *Trends in Dental Education*. Dr. McNulty's informative talk dealt with curricula in Chicago schools as well as those in other parts of the country . . . On November 25, Dr. Albert Buchner Coe, Pastor of the First Congregational Church of Oak Park, well known speaker on the Sunday Evening Forum, spoke on *Suggested Bases for a Just and Durable Peace* . . . On December 2, Dr. Henry S. Stimson will lecture and give a patient demonstration of *A Workable Denture Occlusion* . . . On December 9, Mr. A. H. Johnson, Acting Director of the Chicago Area, will speak on *The F.B.I. and National Defense* . . . Our next monthly meeting, January 8, 1942, will feature Dr. Stanley D. Tylman, who will discuss "Acrylics and Their Application in Crown and Bridge Prosthesis" . . . *Stable Lower Full Dentures* was the subject of Frank G. Young's clinic at the North Suburban Branch meeting on November 12 . . . Merle Long is temporarily disabled with a bad foot because of the fact that he forgot to remove it when he dropped a tank of gas . . . The rumor

that Paul Topel is living away from home is true but it is because his son, John, is quarantined with scarlet fever. So Paul went out and bagged a pheasant for his Thanksgiving dinner . . . Fred Mahlke has taken possession of his latest venture, a new home . . . Werner and Mrs. Gresens are ill with bad cases of the flu, and their son Ronald, is just recovering from pneumonia . . . Our little league scout, O. H. Johnson, reports that K. J. Henson is ripe for the bowling team. Get after him immediately, fellows . . . The Dental Relief Fund is expecting a check for the stamps which were sent you. Let's all do our part by contributing for none of us is immune to advanced age, ill health or accident, and we may someday find ourselves in need of such assistance . . . Hope you had a pleasant Thanksgiving. —Joseph M. Lestina, Branch Correspondent.

ENGLEWOOD

Graduates of the Chicago College of Dental Surgery will be interested in knowing that J. L. Kendall has retired from active duty as Professor of Chemistry and Metallurgy. He is now devoting all of his time to his farm in Wisconsin . . . Algerd W. Prusis, a Chicago College of Dental Surgery man, opened an office on South Western Avenue a short time ago . . . Englewood is giving up one of its members to the U. S. Navy. Frank Smith was ordered to report to the Great Lakes Naval Training station on November 17 . . . Judge Cecil C. Smith delivered an appropriate message in observance of Armistice Day at the November meeting . . . Dr. A. F. Romnes, of the faculty of Northwestern University Dental School, presented a fine paper illustrated by a colored motion picture on *Amalgam Restorations*. Although the attendance at this meeting was good, there is room for improvement. Let's all make it for the Old Timers' Reunion at the December meeting. Note the date—Tuesday, December 9—at 6:00 p.m. when the excellent dinner will be served. Words cannot de-

scribe this occasion. Attendance is essential. It promises to be more joyous, more hilarious, more entertaining than that of 1940.—Henry J. Mathews, Assistant Branch Correspondent.

I have been asked to supplement what has already been written as to our Old Timers' Night, of December 9. Judging by past occasions, the meeting will be overflowing with friendly and sincere handclaps, to say nothing of the fluidity of the punch bowl. Some may say in the early moments of the get together—"Get thee behind me, Satan." But later on may add, as time mellows the cordiality, "Meet you three-quarters of the way, Old Fellow; the ones before this do not count." And the children at home crying for bread!

Ah, me! So does time age the eye, but the heart, never; for we must have *Auld Lang Syne* for tonight, and the next night, and so on for another year with old Englewood.

There will be something of interest besides the aforementioned which will be held in trust until December 9. Let it be said that the ones who have grown from youth to old age under the beneficence of Englewood and its traditions will receive a mark of distinction that may overshadow the Lend-Lease Bill and repeal of the Neutrality Act. At least it has not the earmarks of politics, which in these eventful days is something.

The young men will be there, the old ones must be. Your presence will measure the intensity of your loyalty to the society that has fathered and mothered your professional up-bringing.—F. B. Clemmer.

KENWOOD-HYDE PARK

Kenwood will be celebrating Past Presidents' Night on Tuesday, December 2. Captain Joseph A. Tartre of the U. S. Navy Dental Corps, will be our speaker. Captain Tartre will discuss the function and activities of the Navy Dental Corps. His talk will be supplemented with an interesting motion picture, which will explain how the Navy Dental School

in Washington, D. C. operates. You cannot afford to miss such an interesting program . . . A short note from Willard Johnson indicates that he is enjoying a well earned vacation in Mexico City. Willard attended the American Dental Association meeting in Houston and then teamed up with Rudy Grieff and headed south for an interesting trip through Mexico . . . We also had a card from Bob Kreiner. Bob is now resting in a hacienda at Monterey, Mexico, and expects to visit all the choice spots there . . . Walt Dundon and Bill De Larye recently returned from South Dakota with their game bags full of pheasants . . . Lester Boyd and Otto Mast returned from Dongola, Illinois. They reported that hunting was very good and returned with a generous supply of quail . . . William Luetz spends his weekends on the Illinois River and frequently returns with the limit in ducks . . . The Lester Wilson family expected a girl but instead another boy arrived a few days ago . . . Dave Phillips attended the American Dental Association meeting where he presented a clinic . . . A check mark in your date book should indicate that you will attend the Past Presidents' night on Tuesday, December 2. Call Chef Dangremond and signify that you will be on hand for dinner at 6:30 at the Del Prado Hotel.—Howard E. Strange, Branch Correspondent.

WEST SIDE

Dr. Raymond W. Swanson, teacher of periodontia at the Northwestern University Dental School, will be the speaker of the evening of December 9, at the West Side Branch Meeting. He will supplement his talk with a Kodachrome film on *Periodontoclasia Demonstrating the Operative Procedure*. Immediately following the dinner at 6:30 p.m., the Entertainment Committee will present excerpts from the sound motion picture *Flagships of the Air* . . . At the November meeting *The Construction of the Subway* proved to be an interesting and instructive film. Mr. Rightnor, a subway engineer, very capably explained some of

the complicated details . . . Dr. Ralph Fouser, professor of anatomy at the Chicago College of Dental Surgery, gave an interesting and inspiring talk on *Several Common Lesions of the Mouth and Jaws and the Surgical Treatment*, describing the anatomy involved in detail. He concluded the evening with an excellent kodachrome film, *Surgical Procedure for the Correction of Deformities of the Pre-maxilla and Cleft Palate* . . . The Clinic Committee, of which Caesar E. Newman is Chairman, will provide the instructive features at the January 13 clinic night of the West Side Branch . . . On December 2, the Forum will present E. R. Butterfield, who will speak on *Dentifrices*, and on December 16, Dr. Maynard K. Hine, an instructor at the University of Illinois College of Dentistry, will speak on the topic *Vincent's Infection*. The programs will be continued in January . . . Edward J. Chmiel and Irene Nowak were married Thanksgiving Day at St. Francis Church. The reception was held that evening at the Graemere Hotel . . . A belated report from Leo J. Cahill who attended the American Dental Association convention states that he enjoyed a ten-day Kirckland Tour to Houston, Texas, stopping enroute in the Ozarks to see the location of the filming of "The Shepherd of the Hills." While at Houston he took some side trips, flying to Galveston and San Antonio. Returning by train to New Orleans he stopped at the Biloxi Edgewater Golf Hotel for two days . . . Sam M. Rakow, Chairman of the Relief Committee, asks that we hurry and mail in our contribution for the Christmas Seals to the American Dental Association, 212 East Superior Street. He hopes the West Side Branch returns will be greatly increased this year.—George F. Vogt, Branch Correspondent.

NORTH SIDE

Last call for the North Side meeting, which will be held tonight, December 1, at 6:30, in the Michigan Room of the Edgewater Beach Hotel. The dinner will be \$1.50. Dr. Stanley Tylman will dis-

cuss acrylics with reference to base plates, inlays, crowns and bridges. Drop everything and come . . . Paul Wells repeated his success as host when he entertained the Phy-Dent Club following the weekly bowling session. Mrs. Wells came through in true New England style with an excellent dinner. Paul and Mrs. Wells spent the second Thanksgiving in Iowa City with their daughter Natalie who is attending the University of Iowa . . . Russell Boothe was in Toledo, Ohio, for two weeks taking some work in general anesthesia and visiting the Lions Club . . . A. J. Corn has been called to active service and will report at Camp Wallace, Texas, on December 1 . . . George Schmidt and Jerry Couch spent Thanksgiving hunting quail, on the banks of the Wabash, at Jerry's old home, St. Francisville, Illinois . . . Bill Williams and his family enjoyed their second thanksgiving in Oklahoma . . . William Burkhardt went duck hunting on the Illinois River and, as usual, got the limit . . . Elmer Baker attended the Dads' Day celebration at De Pauw University as the guest of his daughter Joanne. Nothing kept him from shivering at the football game . . . Joseph Dugas has returned from a visit with his family in Boston . . . H. J. Henderson, who was operated for appendicitis at the Swedish Covenant Hospital, is recuperating at home and will soon be back in his office . . . Aaron Swartz is complaining of a sore left arm. He sat beside John Lane at the Northwestern-Notre Dame game and nearly every time Northwestern ran the ball "All American John" blocked Aaron into the aisle . . . Mike Funkey and his dog spent Thanksgiving hunting pheasant near Elgin . . . Despite the fact that George Hax saw neither William Wrigley or the Cubs at Catalina, he enjoyed his three weeks' trip through the west. His report of the Tequila found in New Mexico is glowing . . . Cecil Forslund spent Thanksgiving with his mother in Fairbury, Nebraska . . . Z. D. Ford urges prompt and liberal returns for the Christmas Seals. — *Roland A. Weber, Branch Correspondent.*

SOUTH SUBURBAN

The next meeting of the South Suburban Branch will be held December 2. The subject to be presented will be the use of acrylics, in the construction of bridges, jacket crowns and inlays. The speakers will be Vince Watrin and Robert E. Mitchell. This meeting should appeal to all branch members. As you all know, something new will be learned in the manipulation of this material . . . At the recent Fiftieth Anniversary Celebration held in Harvey, C. E. Simon took the part of Rhett Butler on this occasion. His characterization of this famous person in *Gone with the Wind* was carried out to the minutest detail. Another member of Harvey, G. A. Stevenson did stunt flying at the Rubinkam Airport during the celebration. He has done a lot of exhibition flying within the last three weeks . . . None other than D. C. Altier and his wife were fortunate enough to pick up football tickets for the Southern California-Notre Dame game, on Saturday, November 22, which was played at the Notre Dame homefield . . . "Oh! for the life of a farmer," sings H. W. Bahlman as he hies away to his farm to while away his his spare time . . . Keeping your nose to the grindstone is one thing and keeping your nose to the soil is another, but to get away from both for a bit of relaxation, attend our next meeting. Our Chairman, H. C. Drummond, in charge of the dinner reservations, makes the following statement with emphasis "Please mail me your cards for dinner at once, if you want to eat." . . . All Illinois Alumni bear in mind December 3, which is the date of the Annual Homecoming at the University of Illinois College of Dentistry . . . No doubt you have received your American Dental Association Seals. Don't fail to mail your check as all remittances will go a long way in helping some one in need . . . The meeting on December 2 is the last of the year, so come out and get acquainted.—*L. C. Holt, Branch Correspondent.*

REPORT OF PUBLIC RELATIONS COMMISSION MEETING

(Continued from page 10)

GUESTS

The Commission was honored by the presence of Dr. Oren A. Oliver, President of the American Dental Association. This stalwart appearing man with a military bearing spoke in plain and simple words and gave one the impression of a sincere desire to work toward the betterment of the rank and file of the membership. He spoke of plans for the recall for dental rehabilitation of the dentally rejected draftees and methods of paying dentists for this large volume of business, especially as an aid to bolstering up the hard times which he expected to follow the war. He also assured us of the high esteem with which we are held in official circles in Washington and the likelihood of our receiving a square deal in any possible future legislation. Dr. Oliver was introduced by Dr. Howard C. Miller, a member of the Public Relations Commission, recently elected as trustee of the American Dental Association to succeed Dr. W. H. G. Logan, who served so long and with such distinction.

Also in attendance at this meeting was Moreland Emerson, D.D.S., Director of Dental Health Education, who serves under a very good friend of dentistry, E. A. Piszczek, M.D., Master of Public Health. He described his work and introduced Miss Mary Eagan, one of the seventeen public health nurses under his instruction, who spoke briefly.

HISTORICAL BACKGROUND

It is revealing to learn how many

agencies are willing and anxious to cooperate with dentistry if the opportunity is offered them. Those who often ask the trite question, "What is organized dentistry doing for me?" should spend an evening with the Public Relations Commission. More of the history of this most important Commission will be covered by this reporter in a future article on the theory that a thorough knowledge of history is essential to intelligent present understanding and future action in any field of endeavor. We believe this is also the place to commend Dr. Brevig for his willingness and self-sacrifice in accepting the chairmanship of this Commission after having previously served in the same capacity as well as having given many years of service in the various subdivisions of this Commission.

EXECUTIVE COMMITTEE

Dr. Brevig asked for the privilege of appointing an executive committee where future activities might be organized and whipped into shape for presentation and discussion by the Commission as a whole. This will necessitate fewer meetings of the Commission and, it is hoped, a more complete attendance when a meeting is called. This writer can testify from past experience that the meetings of this Commission are always interesting and that the habit of regular attendance followed by taking part in the discussion and activities can constitute a liberal education in the social aspect of dentistry, and make of one a more well rounded and, hence, better dentist.—
James D. Mershimer.

BOOK REVIEWS

(Continued from page 17)

broader point of view. The author discusses and analyzes recent research on dental caries and pyorrhea and presents in detail results of his statistical studies of the incidence of dental disease. His two concluding chapters "Some biological factors in our loss of teeth", and

"How we can save our teeth" summarize lucidly all that is generally known about the control of dental disease.

The dentist who places this book in his reception room before he reads it thoroughly may invite a few embarrassing questions from his patients. Our advice is to buy this book, read it carefully, and then give it to patients to read.

WANTED

Wanted: Gas machine not over five years old. Address M-4, THE FORTNIGHTLY REVIEW OF THE CHICAGO DENTAL SOCIETY.

SECTION CHAIRMEN REPORT PROGRESS

(Continued from page 8)

sented by Dr. Samuel Chase, of Western Reserve University, and by Dr. Dan Y. Burrill, of Northwestern University Dental School, on jaw development.

A complete and well balanced program of Limited Attendance Clinics will be offered for the Midwinter Meeting, according to Dr. Thomas S. Starshak, Chairman of the Committee. The profession has been thoroughly canvassed and outstanding men in the several fields have been selected and invited to participate in the program. As was the case last year, the first announcement will appear in the program number of THE FORTNIGHTLY REVIEW, scheduled to go in the mails by January 1. A fee of \$1.00 per enrollment will be charged as usual and must accompany the application. Members having definite ideas about enrollment in certain clinics are urged to submit their applications promptly upon release of the program.

Dr. Mefford J. Couch, Vice-Chairman of the Program Committee, has charge of the motion picture program and from all indications there will be many more fine film presentations shown at this meeting than ever before.

BOARD OF DIRECTORS MEETING

(Continued from page 11)

Proposed Amendment to Code of Ethics re Specialists: It was the decision of the American Dental Association committee handling the report of the Society to hold our proposed amendment in abeyance in view of the fact that the Council on Dental Education and Licensure is considering the whole question of specialist practice.

Status of Rosenwald Museum Exhibit: Dr. Oppice stated that a number of prominent exhibitors had been contacted at the Houston meeting of the American Dental Association and told about the possibility of a dental exhibit at the Museum of Science and Industry in Chicago.

REPORT OF NOVEMBER MEETING

(Continued from page 15)

According to Dr. Glupker, methyl methacrylate is the best of the acrylic resins for denture bases and if, in the curing process, the temperature is raised gradually and then the case cooled off gradually good results can be expected.

Several table clinics by members of the Society climaxed the evening's program which definitely was one of value. Further research must be made before acrylic resins can be considered as a panacea. These plastics mould so readily that they lull the user into thinking it's an easy process. Some enthusiasts will place this "glorified putty," as Dr. Skinner calls it, over the cusps of the teeth as they would casting gold. In which event they can expect to open the doors of their reception rooms, someday, to find it full of patients each with his or her own restoration wrapped in tissue paper as mute evidence of confidence misplaced.

For Your Patients, Doctor

There is no time when the use of a budget plan is more valuable or better justified than when dental care is needed.

By offering a low cost budget plan to your patients, you often make it possible to give them the care which you know they should have and which they might not get if such a method for payment was not available.

On accounts over \$100.00, the service charge to your patient is only 5% of the bill for 10 months or 6% of the bill if paid over a period of 12 months. For example, if the bill is \$110.00 and the patient prefers the 10-month plan, the service charge is only \$5.50, making the total contract \$115.50, which can be paid in 10 monthly payments at \$11.55 each.

On accounts under \$100.00 there is a minimum charge of \$5.00 which permits your patient to pay the bill in 10 equal monthly payments.

You receive your check in full at once—less your discount.

You are doing your patients a real favor by offering a low cost budget plan.

NO CO-MAKERS REQUIRED

WORKING FOR AND WITH DOCTORS EXCLUSIVELY

JOHN O. BUTLER COMPANY, 7359 Cottage Grove Avenue, Chicago, Illinois, extends to each member of the profession their thanks for the splendid cooperation given the Dr. Butler Tooth Brush during the year, and their sincere good wishes for a happy Holiday Season and pleasant and Prosperous New Year.

DOCTOR, WHAT ARE YOU
DOING ABOUT THE

"21 Crucial Days?"

The first three weeks while a denture is seating itself are 21 "crucial days" for your patient . . . because, if he becomes discouraged with his denture at the beginning, he may never persevere to eventual mastery of it. And they're crucial days for *you* as a prosthodontist . . . because your patient usually measures your work by how *quickly* he can eat and talk with comfort.

Aware of these important facts, over 50,000 dentists use and recommend DR. WERNET'S Powder to all new-denture cases. DR. WERNET'S Powder forms a thin, protective comfort-cushion that minimizes the irritation of tender gums . . . helps stabilize the denture until the patient has learned to manage it himself . . . promotes ease and assurance . . . speeds denture mastery!

Do Patients Think of You Twice a Year...or Twice a Day?

The dentist whose patients consider him a factor in their every day lives is usually the dentist who enjoys a successful practice. For "personal service" is the foundation of patient loyalty.

Just as the M.D.'s prescriptions for home-care are a constant reminder of the service *he* gives, so *your* prescription of PYCOPE Tooth Powder and Brush can be of twice-daily service to *your* patients. Ethical products, never publicly advertised, they represent your special knowledge . . . symbolize a sincere concern for your patients' well-being.

It's Good Practice To Prescribe

PYCOPE

PY-KO-PAY

TOOTH POWDER & TOOTH BRUSHES

PYCOPE "Council Accepted" TOOTH POWDER can't mat a brush . . . is immediately soluble . . . contains no glycerine, grit, acid, soap . . . no sodium perborate.

PYCOPE BRUSHES have small heads, rigid handles . . . scientifically spaced bristles, wedge-cut tufts . . . a two-month guarantee. Educational folder included.

PYCOPE, Inc., 2 High St., Jersey City, N.J.

Doctor: Are You Having Any Difficulties with Your Dentures?

FOR YOUR NEXT CASE

Try Standardlite (acrylic) with Micro-Mold Teeth. You will be delighted with the result—and pleased with the moderate cost.

IN the forming and finishing of the several sections of the denture margins a technician may achieve or utterly destroy the desired objective of the dentist. One of the important features of CAL FULL DENTURE SERVICE (which we are *qualified* to render) is the training of the technician to understand and interpret correctly the anatomic conditions revealed in the impression. Our men have been personally instructed by Dr. Ewell Neil, and the remarkable results we are able to offer through CAL FULL DENTURE SERVICE eliminate the difficulties so many dentists have had in denture work. Thus, your full denture constructions are assured of expert attention in this laboratory. When you send in your next case, will you kindly specify CAL FULL DENTURE SERVICE?

DO YOU HAVE THIS BOOK? *The Upper and the Lower—a Simplified Full Denture Impression Procedure* by Ewell Neil, D.D.S. 152 pages; 125 illustrations. Price \$1.50 per copy. May we send you one?

Durallium OFFERS YOU

THESE ADVANTAGES

- TENSILE STRENGTH OF 110,000 per sq. inch permits thinner bars, clasps and palates.
- SPECIFIC GRAVITY OF 8.23: Lighter—about $\frac{1}{3}$ the weight of gold, assuring greater comfort.
- PRECISION-ACCURACY in casting for perfect fit.
- NEVER TARNISHES OR DISCOLORS—the beautiful high lustre is characteristic of the metal throughout.
- TOLERATED BY TISSUE—resists oxidation—immune to oral fluids and nearly all acids and alkali.
- ELASTIC. LIMIT OF 70,000 lbs. per sq. inch—permits perfect functioning without breakage.
- LITERALLY ABRASION-PROOF—the hardness assures permanency of smooth finish and polish.
- NO ELECTROLYSIS OR GALVANIC ACTION—may be placed upon fillings or inlays of gold or amalgam.
- INCONSPICUOUS IN THE MOUTH—the colorless high polish reflects tissue and enamel color.
- ADDITIONS MAY BE SOLDERED on with any karat gold or Durallium solder.
